NOTICE OF ALLOWABILITY (PTOL 37)
PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED
IN THIS APPLICATION

Examiner's amendments

An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. § 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the Issue Fee.

In claim 20, at line 2, "tank" has been deleted and in lieu thereof - - container - - has been inserted.

Authorization for this Examiner's Amendment was given in a telephone interview with Mr. Geoffery L. Chase on June 28, 2004.

Reasons for allowance

The following is an Examiner's Statement of Reasons for Allowance:

None of the prior art discloses or suggests a bulk container conditioning system wherein bulk container having hollow interior; a conditioning quantity of ultra high purity liquefied gas in the interior of the container for producing conditioning quantity of liquefied gas above the level of the liquefied gas; system being arranged to produce vapor on the liquefied gas with temperature difference and to condense vapor on the walls of the container without condenser and a valve to vent vapor from gas space.

The closest cited art, Pipkins (3,699,982) discloses tank, a liquid thinner in the tank, heating means for vaporizing the thinner to produce vapor above the space over the thinner liquid, and maintaining walls of the tank surrounding the head space thereof so that the liquid

thinner rinses the side walls above the level of paint. The reference fails to disclose quantity of liquefied gas and a valve to vent the vapor above in the head space. One of ordinary skill in the art would not expect to vent the vapors of thinner to vent in the atmosphere since thinner is a flammable material (see col. 2, lines 63-64).

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The Prior art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lachawiec, Jr. et al (6,616,769) is parent of this application; Stanford, Jr. et al (5,456,759) disclose process for removing sub-micron particulates with carbon dioxide gas and ultrasonic energy; Nishikawa et al (4,944,837) disclose treatment of an article in supercritical atmosphere of carbon dioxide; and Gerald (1,891,592) discloses process for removing deposits from the interior of hydrocarbon storage tanks by injecting vaporous carbon tetrachloride and then steam.
